OM SAINI

COMPUTER SCIENCE • DIGITAL & SOCIAL MEDIA • BUSINESS OPERATIONS

Jaipur, Rajasthan | +91 7691872409 | singodiaom@gmail.com
GitHub | LinkedIn

PROFESSIONAL PROFILE

Multidisciplinary Computer Science Engineering student with practical exposure across software and data projects, social media content creation, industrial operations, on-ground coordination and communication. Combines a technical foundation in programming, DBMS, DSA/DAA concepts, machine learning and web development with hands-on experience supporting inventory and dispatch workflows, documentation, site observations, and social media content for business and education-focused social media content. Adaptable, quick to learn, and comfortable contributing across technical and non-technical tasks.

CORE SKILLS

COMPUTER SCIENCE
Python, C/C++, DSA fundamentals, DAA concepts

DATABASES
MySQL, SQL, DBMS, normalization, keys, constraints

DATA & ML
pandas, NumPy, scikit-learn, XGBoost, Random Forest, GridSearchCV

WEB & TOOLS
HTML, CSS, JavaScript, React, Git, GitHub, Vercel

DIGITAL & SOCIAL
Content planning, post/story design, captions, brand consistency

OPERATIONS
Inventory/stock entries, storage/dispatch, documentation, E-Way Bill basics, GeM exposure

PRACTICAL EXPERIENCE

Shree Balaji Engineer (SBE) — Practice School / Internship | *18 May – 1 July 2026*

Industrial Operations • On-ground Work • Documentation • Digital Marketing

- Worked with real operational workflows, including industrial spare-parts handling, stock/inventory entries, storage, dispatch support and related documentation.
- Observed industrial/site operations, including a solar-site visit; supported technical photography and learned how field activity connects with office coordination.
- Gained exposure to stock management, organizing information, tracking items and maintaining operational records.
- Learned basic E-Way Bill documentation and gained introductory exposure to GeM (Government e-Marketplace).
- Supported social media activities across Instagram, LinkedIn, Facebook and X: post planning, content creation, captions, brand consistency and coordination.
- Built an understanding of how on-ground operations, documentation, business communication and digital marketing work together.

Social Media Content Support - Shree Balaji Engineer

- Supported post planning and content presentation for industrial business updates and brand messaging.

Social Media Content & Creative Work - DS Foundation Institute | *30 June 2026 - onward*

Education-focused social media content

- Created Instagram post and story content from 30 June 2026 onward, as described by the user, including educational announcements and campaign creatives.
- Worked on layout, text hierarchy, brand colours and consistency across institute communications.

Branding & Business Launch Support - DS Fleet Mobility | *15 Oct. 2026 - Ongoing*

New mobility business initiative

- Designed the business logo and contributed to the initial visual identity and brand presentation.
- Supported early social-media presentation for a mobility-services concept.

TECHNICAL PROJECTS

Hospital Management Database |

October2025

MySQL • SQL • DBMS

- Designed a normalized database using primary/foreign keys and constraints to reduce redundancy and support consistent record management.

EventMint — Web3 NFT Ticketing Platform |
February 2026
Monad Testnet • ERC-721 • Web3
• Designed an on-chain event-ticketing concept using NFT ownership and verification with smart-contract integration.

UPI Fraud Detection System |
April 2026
Python • XGBoost • React
• Developing a machine-learning workflow to identify suspicious UPI activity, with transaction analysis, fraud prediction and a web interface for checks and alerts.

EV Performance & Battery Health Analysis |
May 2026
Python • pandas • NumPy • scikit-learn • Random Forest • GridSearchCV
• Explored EV data and studied battery health against charge cycles, temperature, mileage, capacity and charging time; experimented with regression and classification.

EDUCATION

B.Tech — Computer Science Engineering | *2024–2028*
JK Lakshmipat University, Jaipur

VOLUNTEERING & COORDINATION

Volunteer | *2023–2024*
Event support • Planning • Coordination • Teamwork
• Assisted with events and programs, supporting organization, planning and on-ground coordination.
• Helped activities run smoothly, supported orderly facilities and completed assigned responsibilities with others.
• Developed teamwork, communication, reliability, time management and responsibility while supporting group activities.

COMPUTER SCIENCE FOUNDATIONS

• Programming:, C ,Python, C++ and programming fundamentals.
• DSA: Data Structures and Algorithms - foundational academic knowledge and problem-solving concepts.
• DAA: Design and Analysis of Algorithms - academic concepts around algorithm design, complexity and efficiency.
• DBMS & MySQL: relational databases, SQL queries, normalization, primary/foreign keys and constraints.
• Machine Learning: preprocessing, exploratory data analysis, classification/regression workflows and model evaluation concepts.
• Web development: HTML, CSS, JavaScript, React ; tools include Git/GitHub and Vercel.
• Blockchain/Web3 exposure: Solidity, Thirdweb, Ethers.js, OpenZeppelin, MetaMask and Monad Testnet.

DIGITAL MARKETING & CREATIVE CAPABILITIES

• Social media content planning and creation: posts, stories, captions, announcements.
• Design and presentation: layout, typography/text hierarchy, logo design, brand colours, visual consistency and business-oriented messaging.
• Platform exposure: Instagram content work; internship exposure to LinkedIn, Facebook, X and Meta Business Suite.
• Business content for industrial services, education announcements and an early-stage mobility brand.
• Coordination: aligning content with business needs, organizing creative tasks and adapting designs based on feedback.

OPERATIONS, FIELD EXPOSURE & PROFESSIONAL STRENGTHS

• On-ground exposure: stock handling, inventory entries, spare-parts organization, storage, dispatch support, documentation and site observation.
• Business process exposure: basic E-Way Bill documentation, introductory GeM familiarity, professional documentation and operational coordination.
• Strengths: quick learning, adaptability, teamwork, communication, problem-solving, multitasking, responsibility and independent task completion.

CERTIFICATIONS

- Programming Fundamentals using Python - November 2025
- Database Management System - November 2025
